## PALLETIZING SOLUTION

The Robotiq Palletizing Solution redefines ease of use for automated palletizing platforms. Create your program in minutes—directly on the teach pendant—to automatically generate all robot movements and trajectories.

Elevate your workforce with easy-to-use robot solutions that do the work for you.

- Easy installation and deployment
- No programming skills required
- Quick changeovers
- Simple safety integration
- Frees workers for higher-value tasks

## SCREWDRIVING SOLUTION

The Robotiq Screwdriving Solution gets the work done right in simple small-screw assemblies.

Thanks to the 5-minute changeovers it enables, manufacturers can produce multiple products per assembly line.

- Easy installation and deployment
- No programming skills required
- Quick changeovers
- Simple safety integration
- Frees workers for higher-value tasks

## WHO WE ARE

Manufacturers struggle to put robots to work in their factories because it's still too costly and too complicated. Robotiq's tools and know-how simplify collaborative robot applications, so factories can start production faster. Robotiq works with a global network of connected robot experts supporting their local manufacturers.

## OUR MISSION

**Free human hands**  
from repetitive tasks

## AT A GLANCE

**12,000+** Hands Freed

**300+** Channel partners globally

## LEAN ROBOTICS

Save time with a **step-by-step methodology** that helps you go from a manual task to a robotic one.

[amazon.com](https://www.amazon.com)

# RESOURCES

Empower yourself with Robotiq products and cobot applications, using the only elearning platform integrating Lean Robotics concepts.

[elearning.robotiq.com](http://elearning.robotiq.com)

## Case Studies

There's nothing like real life examples to see the difference Robotiq Plug + Play Components make. Watch how companies, big and small, are deploying robots in their factories and how they improved their business with Robotiq.

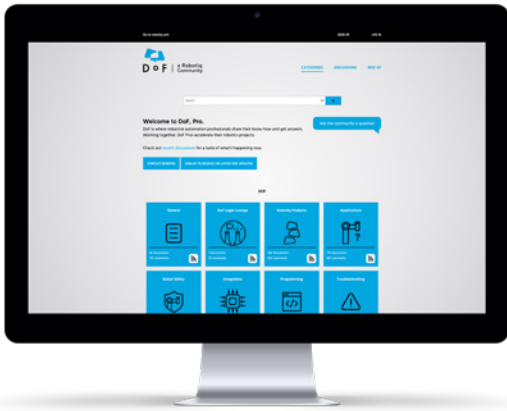

[robotiq.com/resource-center/case-studies](http://robotiq.com/resource-center/case-studies)

## eBooks

We love writing about different aspects of robotics and automation. In fact, we've written dozens of eBooks, all available for **free** in our resource center.

[robotiq.com/resource-center/ebooks](http://robotiq.com/resource-center/ebooks)

### Get technical insights from cobot experts

DoF is where industrial automation professionals share their know-how and get answers. Working together, DoF Pros accelerate their robotics projects.

[dof.robotiq.com](https://dof.robotiq.com)

## Ready to automate?

Blueprints is a **free service** that helps manufacturers accelerate their robotic cell process.

1. Access [blueprints.robotiq.com](https://blueprints.robotiq.com) to describe and document your current task.
2. Our integration coaches will help you automate it.

# THE ROBOTIQ

- › **Factory proven** hardware
- › The most **user-friendly software** for cobots
- › **Product synergy** between each component
- › **10 years of experience** in cobot applications
- › **99% satisfaction rate** in proof-of-concept and support services

**48H**

# PLUG + PLAY COMPONENTS

## THE GRIPPER FOR COLLABORATIVE ROBOTS

- Plug + Play and easy to program
- Ideal for precision assembly tasks
- Ergonomic shape for hand-guiding
- Built for industrial applications and harsh environments
- Automatic part detection, position feedback, and part validation

## SPECIFICATIONS

Stroke (adjustable)	50 mm	2 in
Grip force (adjustable)	20 to 185 N	4.5 to 41 lbf
Form-fit grip payload	5 kg	11 lbs
Friction grip payload*	4,7 kg	8.8 lbs
Gripper weight	1 kg	2 lbs
Position resolution (fingertip)	0.4 mm	
Closing speed (adjustable)	20 to 150 mm/s	0.8 to 5.9 in/s
Communication protocol	Modbus RTU (RS-485)	
Ingress protection (IP) rating	IP67	

\* Calculated for the use of silicon covered fingertips to grip a steel object, at a low robot acceleration.

\*\* All specifications provided for reference only. See user manual at [support.robotiq.com](http://support.robotiq.com) for official specifications.

# 3-FINGER ROBOT GRIPPERS

## PROVEN DESIGN

- Rugged and reliable
- Fully metallic
- High payload

## TAKE FULL CONTROL

Adjust the gripper's position, speed, and force until it grasps your object perfectly

## EXTREMELY WIDE STROKE

Open up to 155 mm with the encompassing grip mode

Pick & Place

Assembly

Machine Tending

Quality Testing

## SPECIFICATIONS

Stroke (programmable)	155 mm
Grip force (programmable)	30 to 70 N
Form-fit grip payload	10 kg
Friction grip payload	2.5 kg
Finger position repeatability (fingertip grip)	0.05 mm
Closing speed (programmable)	22 to 110 mm/s
Gripper weight	2.3 kg
Primary communication protocol	Modbus RTU (RS-485)
Secondary communication protocol options	Modbus TCP, EtherNet/IP, PROFINET, EtherCAT, DeviceNet, CANopen

\* All specifications are provided for reference only. See User Manual at [support.robotiq.com](https://support.robotiq.com) for official specifications.

## SKUs

## 3-FINGER ROBOT GRIPPERS

### AGS-UR-KIT

3-Finger Adaptive Gripper kit for UR

- 1 x 3-Finger Adaptive Gripper with Modbus TCP option
  - 1 x 10 m high flex Supply Cable
  - 1 x 10m Communication Cable
  - 1 x USB Cable
  - 1 x Grease syringe
- 1 x 3-Finger Coupling S-101
- 1 x 3-Finger Wrist Adapter Plate S-157
- 1 x USB Stick

## DEMO

### AGS-DEMO-KIT

Demo kit for distributors (3F)

- 1 x 3-Finger Adaptive Gripper with Modbus TCP option
- 1 x Power supply 24V/2.7A
- 1 x 3-Finger demo kit carrying case

## COMBO

### AGS-FTS-S-UR-KIT

3F Gripper and FT300-S Sensor kit for UR

- 1 x 3F Gripper UR KIT
- 1 x FTS300 Sensor kit for UR

# WRIST CAMERA

VISION MADE FOR UNIVERSAL ROBOTS

## EASY TO USE

- Teach, edit, and run via the teach pendant
- Accelerate changeovers with Visual Offset
- Operate with any expertise level

CAD IMPORT

VISUAL OFFSET

CODE READING

# FAST & REPEATABLE PART DETECTION

## APPLICATIONS

PICK & PLACE

MACHINE TENDING

QUALITY TESTING

ASSEMBLY

## FEATURES

**CAD Import**

**One-click workplane**

**Auto-pick**

**Parametric part teaching**

**Gripper clearance check**

**Visual offset**

**1D and 2D barcode reading**

**Image saving**

**Shape programming wizard**

**Assembly management**

## BENEFITS

- ▶ Teach a model using your own CAD file
- ▶ Create additional workplanes for your pick and place application with only one click
- ▶ Automatically creates the picking action with a centered position

- ▶ Ideal for faster blank programming
- ▶ Robust program minimizes production downtime
- ▶ Use the Robotiq tag to offset the robot program and accelerate changeovers

- ▶ Perform real time quality control
- ▶ Trace parts in a product assembly  
Program picture parameters for a personalized visual traceability

- ▶ Program complex parts in minutes
- ▶ Simultaneously manage different parts for flexible assembly sequences  
Enables robot to work in structured or unstructured environments

## SPECIFICATIONS

Sensor & Optics	5 MP color sensor, electrically adjustable focus, 70 mm to infinity
Integrated Lighting	Two units (diffused white LED)
Programmable Parameters	<ul style="list-style-type: none"> <li>• CAD file import teaching (.dxf)</li> <li>• Automatic part teaching (user defined arbitrary shape)</li> <li>• Parametric part teaching (circle, ring, square, rectangle)</li> <li>• Edge editing, object color and clearance validation</li> <li>• Automatic and manual camera parameters: exposure, focus, LED lighting, white balance</li> </ul>
Electrical	Direct communication with UR controller (via USB), and power supply from controller (24 V)
Weight	160 g
Operating Temperature	0°C to 50°C
Camera Internal Image Buffer	DRAM memory

\* All specifications are provided for reference only. See User Manual at [support.robotiq.com](http://support.robotiq.com) for official specifications.

# APPLICATION KITS

# BIN PICKING *KIT*

## **AUTOMATE** REPETITIVE, TEDIOUS AND NON-ERGONOMIC TASKS

Aligned with our core value of democratizing automation, the Bin Picking Kit sets a clear path for locating, picking, handling, and placing parts.

It's not just about the combination of great products, it's also about the extensive knowledge we make available to you.

**Try bin picking with a "Robotiq touch".**

## WHAT'S INCLUDED

- EPick with the extension kit
- Machine Tending Copilot
- Pickit M-HD camera

Bin picking module on

**ROBOTIQ**  
eLearning

# WHY ROBOTIQ?

## EXPERIENCE PROVEN PRODUCTS

Robotiq's EPick and Pickit's M-HD 3D camera.

## eLEARNING LESSONS

Our eLearning lessons set clear expectations on feasibility and cell throughput.

## EASY INTEGRATION

We provide guidance through every step involved in bin picking.

## FAST DEPLOYMENT

The value we bring makes it an optimal solution to earn a quick ROI thanks to low costs and fast deployment speed.

START  
PRODUCTION  
FASTER

## SPECIFICATIONS

# SANDING **KIT**

## **AUTOMATE ONE OF THE TOUGHEST, DIRTIEST JOBS**

- Save hours of programming
- Increase quality and productivity
- Reduce worker injuries
- The only complete sanding solution for Universal Robots

## **WHAT'S INCLUDED**

- Finishing Colilot
- Orbital tool
- Bracket
- Sanding Media
- Quick Start Guide
- Air control Accessories

# SUPPORTED MATERIALS

WOOD

PLASTIC

METAL

FIBERGLASS

SOLID SURFACE

CARBON FIBER

## GENERATE A FINISHING PATH IN MINUTE

Program complex finishing trajectories by teaching less than 10 waypoints, even on complex, spherical surfaces. Apply constant force at each cycle.

## PRO TIPS

Robotiq is a pioneer in force control for collaborative robots. Our sanding [e-learning platform](https://elearning.robotiq.com) includes our best lessons learned in the past 10 years. Use it to save hours of programming: [elearning.robotiq.com](https://elearning.robotiq.com).

## VALIDATE PART LOCATION

The contact offset node uses reference points on the part to validate its position. If there's a slight change, the robot program automatically adapts all related parameters.

## SPECIFICATIONS

### Random orbital sander

Maximum air supply	6.2 bar (90 PSI)
Air flow (full speed)	450 L/min (16 SCFM)
Pad diameter	5"
Media	Hook and loop; 5 holes
Orbit diameter	3/16"
Maximum speed	12,000 RPM
Air supply inlet	1/4" NPT thread
Dust exhaust	Central vacuum ready; 1" (25 mm) diameter.

### Robotiq bracket

Weight	0.42 kg
Added height	9 mm
Compatible sanders	Dynabrade 56854B, 56819B, 56830B, 56863B, 56844B, 57404B, 57814B
<b>Control valve</b>	
Air supply inlet/outlet	1/4" NPT thread
<b>Sanding media kit</b>	
Grits	60, 80, 120, 320, 400

**SKUs**

CARBON FIBER

## EASY TO INTEGRATE, EASY TO USE

Finishing applications for collaborative robots require many hardware and software components to communicate together. Integration can take months... but not anymore! The surface finishing kit is the only hardware and software all-in-one solution for cobots.

## PROGRAM IN MINUTES

Teach a finishing path on a flat surface out of only 4 waypoints and let the program adjust to different part sizes. Add custom weaving movements specific to your process in no time.

## GENERATE COMPLEX PATHS

Program complex finishing trajectories by teaching fewer than 10 waypoints. Finishing Copilot generates a complete path and applies consistent force at each cycle, whether it's on a curved (6 waypoints), or spherical (9 waypoints) surface.

## VALIDATE PART LOCATION

The contact offset node uses reference points on the part to validate its position. If there's a slight change, the robot program automatically adapts all related parameters.

## SPECIFICATIONS

### Pneumatic specifications

Valve maximum operating pressure 8.3 Bars

Valve input port 1/4 NPT

### Electrical Specifications

Air supply inlet/outlet 24 V

### Mirka bracket

External envelope without sander [77 89 37] mm

Added height 7 mm

Product weight without sander 0.221 kg

### Dynabrade bracket

External envelope without sander [100 119 31] mm

Added height 9 mm

Product weight without sander 0.420 kg

# CNC MACHINE TENDING **KIT**

ROBOTIQ'S CNC MACHINE TENDING KIT IS YOUR FIRST STEP TOWARDS **FAST AND SIMPLE AUTOMATION**. THE KIT IS OPTIMIZED FOR CNC MACHINING OPERATIONS.

## WHAT'S INCLUDED

- **Machine Tending Copilot** including Force Copilot and Contact Offset
- **Dual Hand-E grippers** with angled bracket (90°)
- **Fingertip starter kit** including a fingertip extender for larger parts
- **Robotiq Wrist Camera (optional)** including the new Visual Offset function
- **eLearning Course** on how to best use your kit

# EVERYTHING YOU NEED IN ONE KIT

## 1 IMPROVE CYCLE TIME WITH A DUAL HAND-E CONFIGURATION

Increase productivity and improve your cycle time with a dual configuration, which lets you handle more objects at a time.

## 2 MOVE YOUR ROBOT FROM ONE MACHINE TO ANOTHER FOR A FASTER ROI

Machine Tending Copilot includes Force Copilot and Contact Offset, which lets you move your robot from one machine to another without having to reprogram it.

## 3 INCREASE PRECISION AND RELIABILITY WITH FORCE COPILOT

Force Copilot helps you execute repeatable part positioning within a CNC fixture.

## 4 BUILT FOR INDUSTRIAL APPLICATIONS AND HARSH ENVIRONMENTS

With an IP rating of 67, Hand-E and the Robotiq Wrist Camera can withstand harsh industrial conditions, such as chips, cutting oil, and coolant.

## 5 DON'T WORRY ABOUT PART PRESENTATION

Pick any part with an easy-to-use camera built for Universal Robots. The new Visual Offset function on the Robotiq Wrist Camera lets you locate a tray of parts without any complex part presentation systems.

### SPECIFICATIONS

Dual Hand-E Setup	UR5	UR10
Total weight	2.40 kg	2.40 kg
Total weight with camera	2.56 kg	2.56 kg

Hand-E Adaptive Gripper	UR5	UR10
Stroke	50 mm	50 mm
Grip force	20 to 185 N	20 to 185 N
IP rating	IP67	IP67

Wrist Camera	UR5	UR10
Minimum field of view	10 x 7.5 cm	10 x 7.5 cm
Maximum field of view	64 x 48 cm	100 x 75 cm
Minimum part size (as percentage of field of view)	10%	10%
Maximum part size (as percentage of field of view)	60%	60%
Focus range	70 mm to infinite	70 mm to infinite
IP rating	IP67	IP67

All specifications provided for reference only.

See user manual at [support.robotiq.com](https://support.robotiq.com) for official specifications.

# EXTERNAL TOOL FINISHING KIT

## AUTOMATE APPLICATIONS WITH AN EXTERNAL TOOL

- Save hours of programming
- Compensate for external tool wear
- Program with an intuitive interface
- Operate with any expertise level
- Automate one of the toughest, dirtiest jobs

## WHAT'S INCLUDED

- Finishing Copilot
- Hand-E adaptative grippers

# AUTOMATE FINISHING TASKS THE EASY WAY

## COMPENSATE FOR TOOL WEAR

Finishing Copilot's contact offset node uses a point on the external tool as a reference to measure wear. With 0.2 mm precision, Contact Offset validates the tool's exact position at any moment. If there's a slight change, the robot program will automatically adjust all relevant parameters.

## SET EXTERNAL TOOL CENTER POINT

Robotiq Finishing Copilot software, which is included in the kit, allows you to program an external TCP. It lets the robot know that the finishing tool is external to the robot, unlike most cobot applications. The finishing task is then processed with the robot bringing the part to the external TCP.

## SPECIFICATIONS

### Hand-E Adaptive Gripper

Adjustable stroke	50 mm
Grip force	20 to 185 N
Payload	5 kg
Weight	1 kg
Position resolution	0.2 mm
Closing speed	20 to 150 mm/s
Ingress protection (IP) rating	IP 67

All specifications provided for reference only.  
See user manual at [support.robotiq.com](https://support.robotiq.com) for official specifications.

## THE GRIPPER FOR COBOTS

Hand-E offers a strong grip, an intuitive interface and IP 67 rating

# APPLICATION SOLUTIONS

# ROBOTIQ PALLETIZING *SOLUTION*

Simplicity Meets Flexibility

**AUTOMATICALLY  
GENERATED AND OPTIMIZED  
SMOOTH MOTION**

**UP TO  
13 BOXES PER MINUTE**

**EASE-OF-USE IS REDEFINED  
WITH THE ROBOTIQ  
PALLETIZING SOLUTION**

**Open the box**, and the hardware and software is already connected. **Plan your set-up** in just three steps directly on the robot control device.

# WHAT'S IN THE BOX?

## SET-UP YOUR APPLICATION IN 3 EASY-STEPS

Enjoy a quick and 3 easy step set-up through our user-friendly platform.

Experience how seamless it is to use our application software called Material Handling Copilot. Generate and automatically optimize all trajectories and robot movements. Ready, set and go!

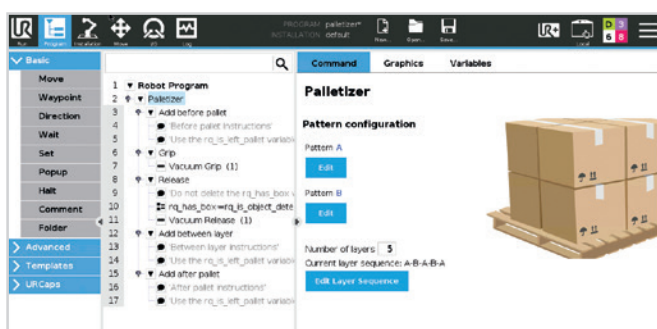

### 1 ENTER BOX DIMENSIONS & WEIGHT

### 2 ENTER PALLET DIMENSIONS

### 3 SET PALLET PATTERN

## IT'S ALL CONNECTED

**No need to design or program the connection between the robot controller and 7th axis or box sensor; we've done it.**

All the elements included in the box are connected, so you don't have to spend any time on this.

## HIGH PERFORMANCE

**Earn an ROI faster than with other cobot solutions, because of the high performance cycle time.**

What makes it perform so well? Optimized, synchronized motion control of the cobot and 7th axis. Plus, seamless movements also mean a longer life cycle for your cobot.

## FITS EASILY WITHIN YOUR EXISTING FLOOR PLAN

The Robotiq Palletizing Solution fits easily within your existing floor plan, given its small footprint. No need to reorganize your floor layout around a central robot.

## SAFETY FIRST

Because safety is crucial, we have built an environment for safe integration. We also support third-party safeguard devices.

## AIRPICK INCLUDED

**With the Robotiq Palletizing Solution, you don't need to buy components from different sources. Our AirPick vacuum gripper is included.**

- Industrial grade components
- Powerful vacuum flow
- Compact design
- Low noise
- Low maintenance

## THE CONFIGURATOR

**Still not sure our solution is for you?**  
**Easily validate product fit for your situation**  
**with the Configurator.**

Validate your KPIs straight from the start.  
 Validate your throughput with your own data!

### All you need:

1. Box dimensions and weight
2. Pallet dimensions
3. Pallet pattern

Upon entering this information, you will find out if your boxes, pallets, and patterns fall within the solution's limits. If they do, the configurator will give you key indicators related to your application, such as how many boxes per minute can be palletized.

## SPECIFICATIONS

Box	
Max payload with EOAT	Up to 16 kg Up to 35 lb
Max Box throughput	Up to 13 boxes/min*
Min Box dimensions	50 x 50 x 50 mm 2 x 2 x 2 in

\*Depends on box weight, dimensions, surface, pallet dimensions and layouts.

Pallet	
Pallet dimensions - width	from 300 to 1219 mm from 12 to 48 in
Pallet dimensions - depth	from 300 to 1219 mm from 12 to 48 in
Pallet height (empty)	min 25mm min 2 in
Pallet height (filled)	max 2750 mm max 108 in
Max number of box patterns	2

# ROBOTIQ SCREWDRIVING *SOLUTION*

## Elevate your workforce

- Consistent screwdriving around the clock.
- 5-min production changeovers.
- Complete solution designed for flexible automation of your screwdriving tasks.

## Fewer injuries and a happier workforce

When you automate a screwdriving task, you keep employees from harm and can redirect them to value-added tasks. Elevate your workforce with a simple and easy-to-use automation solution.

## CONSISTENT SCREWDRIVING AROUND THE CLOCK

- Free workers for higher-value tasks
- Reduce repetitive strain injuries
- Improve product quality
- Solve labor shortages

### A single fastening solution to handle production changeovers **in small-screw assembly**

Deploy and master your robotic screwdriving application by adding Robotiq Screwdriving Solution to a UR cobot. So intuitive, no robotics experience is required.

Get a simple, cost-effective automation solution, and say hello to consistent screwdriving around the clock.

### Designed for **flexible automation**

- Automate easily, without massive investment
- Intuitive to deploy and duplicate
- 5-min production changeovers

# PROGRAM YOUR APPLICATION IN 2 EASY STEPS

1

## PICK SCREW COMMAND

Command

Graphics

Variables

### Pick Screw

Select the digital inputs of the Screw Feeder.

Feeder status

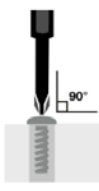

Screw ready

☒ Retry on failure

Slightly insert the screwdriving bit in the screw drive and tap on Set pick position.

The approach position is preset with a 10 mm offset.

Tap the Test button to cycle through the Pick Screw program.

2

## DRIVE SCREW COMMAND

Command

Graphics

Variables

### Drive Screw

Stop condition   Nm

Tool speed  RPM

Force applied on screw  N

☒ Advanced settings:

Angle before ramp down  deg

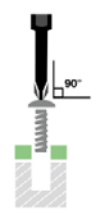

☐ Left-Hand Threads

Error Conditions

☐ Retry on failure

☐ Distance tolerance ( $\pm$ )  mm

☒ Timeout  s

Control the screwdriver directly from the UR Toolbar to use, test or set it.

Seamlessly integrate the force sensing, vacuum, cobot, screwdriver, and screw feeder.

Automatically apply error-proofing functions to improve productivity and quality.

## SCREWDRIVER

No external controller

Compact and lightweight

Robust vacuum system transports screws of any material

Off-the-shelf compliant vacuum sleeves accommodate your part tolerances

3.5-inch bits and vacuum sleeves for hard-to-reach locations

## SCREW FEEDER

No additional parts needed to adapt to various screw sizes

Dual sensor indicates **screw ready** and **screw cleared from workspace**

Mounting bracket included

Robust industrial exterior finish

300-cc screw chamber volume

Intuitive adjustment with real-time confirmation

## SPECIFICATIONS

Screwdriver SD-100	Min	Typical	Max
Torque range	1 Nm 9 in-lbs	-	4 Nm 35 in-lbs
Torque precision	-	±10% <sup>1</sup>	-
Screw diameter	M2.5 #3	-	M5 #10
Speed	1 RPM	-	500 RPM
Air consumption	-	80 L/min	-
Weight	1.5 kg 3.3 lb		
Dimensions	280 mm x 152 mm x 57 mm 11 x 6 x 2 1/4 in		
Warranty	2M cycles under normal operation		
ESD-safe	Yes		

1. Value at initial factory calibration. Accuracy typically increase when calibrated in operating conditions, depending on joint materials.

Screw Feeder SF-300	Min	Max
Screw diameter	M2.5 #3	M5 #10
Screw length	6 mm <sup>1</sup> 1/4 in	25 mm 1 in
Screw head height	-	5 mm 3/16 in
Typical feed rate	-	3 s per screw
Screw chamber volume	300 cc	
Dimensions (W x D x H)	157 mm x 286 mm x 171 mm 6.18 x 11.25 x 6.73 in	
Power supply	120/220V AC to 24V DC	
Weight	5.2 kg 11.4 lb	
Warranty	2M cycles under normal operation	
ESD-safe	Yes	

1. For socket head screws, the minimum screw length is 10mm. Please validate with your Robotiq representative for shorter screws.

## OVERVIEW

Feature	What is it?	Advantage
<b>Error-proofing</b>	<p>Pre-programmed error-detection and recovery functions:</p> <ul style="list-style-type: none"> <li>• Screw presence detection.</li> <li>• Torque and screw position control.</li> <li>• OK/Not OK confirmation.</li> </ul>	<ul style="list-style-type: none"> <li>• Ensures correct torque is applied.</li> <li>• Eliminates risk in the process.</li> <li>• Prevents fastening failures.</li> <li>• Saves programming time.</li> </ul>
<b>Vacuum transportation system</b>	<p>Integrated vacuum system that allows for reliable screw transport while ensuring maximal slender reach.</p>	<ul style="list-style-type: none"> <li>• Allows the robot to validate screw presence at all times.</li> <li>• Allows the system to transport screws of any material.</li> <li>• Requires no customization.</li> <li>• Enables maximal reach into tight spaces.</li> </ul>
<b>One-SKU solution</b>	<p>With one SKU, you get the screwdriver, screw feeder, screwdriver bits and vacuum sleeves, screwdriving URCap, and the latest force-sensing technology.</p>	<ul style="list-style-type: none"> <li>• Simplified ordering.</li> <li>• Simplified tracking.</li> <li>• Simplified management of spare parts.</li> <li>• No need to purchase additional parts.</li> </ul>
<b>Dual sensors in screw feeder</b>	<p>Dual sensor indicates both screw ready and screw cleared from workspace.</p>	<ul style="list-style-type: none"> <li>• Prevent pick command from activating if a screw is not ready.</li> <li>• Avoid collisions.</li> <li>• Coordinate robot and screw feeder movements.</li> </ul>
<b>Automated communication between every components</b>	<p>Getting separate components (screw feeder, screwdriver, robot, and more) to communicate has never been easier.</p>	<ul style="list-style-type: none"> <li>• Simple programming to help you master your processes.</li> <li>• Decrease deployment time.</li> </ul>
<b>Designed to reach tight spaces</b>	<p>We've designed a compact and lightweight screwdriver with flexible vacuum sleeves for optimum screwdriving.</p>	<ul style="list-style-type: none"> <li>• Allows screwdriving in chamber holes.</li> <li>• Allows screwdriving in tight spaces.</li> </ul>
<b>Open program tree</b>	<p>Robotiq Screwdriving URCap integrates the force sensing and force control functions to automatically program a pick and a screw, but the program tree is open for you to develop any advanced programming sequence.</p>	<ul style="list-style-type: none"> <li>• Adapt the solution to fit your unique application.</li> </ul>

# SERVICES

At Robotiq, we strive to free more human hands from repetitive tasks. To do so, we offer tools and services to empower you to deploy your project on your own and master your processes.

## SCREWDRIVING PROOF OF CONCEPT

Our team of coaches is here to help you prove that our solution can work for your application, as well as avoid technical issues and simplify your introduction to the robot world.

### Examples services:

- Demonstrate application fit
- Validate cycle time
- Demonstrate repeatability

## REMOTE AND ONSITE TRAININGS FOR ROBOTIQ SCREWDRIVING SOLUTION

Our training aims to fast-track your introduction to the ever-growing collaborative robot industry.

- Intro to cobots
- Solution installation
- Solution operation
- Troubleshooting and maintenance
- Calibration
- Force Copilot for Assembly

# FINISHING C→PILOT

## A SOFTWARE MADE FOR FINISHING APPLICATIONS

- Save hours of programming
- Generate finishing trajectories in minutes
- Compensate for external tool wear
- Set an external tool center point
- Operate with any level of expertise

## OTHER FEATURES

- Find a surface
- Perform various insertions
- Hand-guide your robot
- Follow complex trajectories
- Edit point-to-point trajectories
- Apply constant force and define the stiffness for each axis
- Reset sensor values to zero

## PART TO PROCESS

### SET EXTERNAL TOOL CENTER POINT

Finishing Copilot lets you program an external TCP. This tells the robot that the finishing tool is external to the robot, unlike in most collaborative robot applications. The finishing task is then processed with the robot bringing the part to the external TCP.

### COMPENSATE FOR TOOL WEAR

The contact offset node uses a point on the external tool as a reference to measure wear. Contact offset validates the tool's exact position anytime you wish. If there's a slight change, the robot program automatically adapts all related parameters.

## PROCESS TO PART

### GENERATE A FINISHING PATH IN MINUTES

Program complex finishing trajectories by teaching fewer than 10 waypoints. Whether it's on a flat (4 waypoints), curved (6 waypoints), or spherical (9 waypoints) surface, Finishing Copilot generates a complete path and applies consistent force at each cycle.

### VALIDATE PART POSITION

The contact offset node uses reference points on the part to validate its position. If there's a slight change, the robot program automatically adapts all related parameters.

# MACHINE TENDING C<sup>PILOT</sup>

A SOFTWARE MADE FOR MACHINE TENDING  
Compatible with only UR+ end of arm tooling

Locate your tray between cycles to ensure repeatable part picking.

Move your robot from a machine to another without having to reprogram it.

Validate your vise's exact position at any moment with a simple contact. The robot will automatically adapt all relevant parameters.

Find the exact surface on your fixture to execute repeatable part positioning.

## OTHER FEATURES

- Hand-guide your robot
- Follow complex trajectories
- Edit point-to-point trajectories
- Apply constant force and define the stiffness for each axis
- Reset sensor values to zero
